

Annual Report

Good afternoon one and all, on the behalf of Vibgyor world school fraternity i extend a heart full gratitude to everyone for being here . Today we have honorable Sh. B.S Thakur deputy director of education inspection wing Kullu, our special guest of honor Sh. J. K. Thakur ji (Principal retd school cadre)Hans Raj acharya ji principal inspection wing , distinguished guests , presents teachers, ladies and gentleman and my dear students, I would also like to welcome all the media persons here from different groups . I would like to thank our chief guest for today 's function he has spared his valuable time for us from his extremely busy schedule. thanks a lot sir '

This is a co-incidence when my both the favorite teachers are there in our school to bless we and to our students. Today all because of their inspiration and motivation, I am able and encouraged to impart quality education to my pupils. I remember how the terms like vibgyor and avogadros no were taught to us in a very easy and simple way. I am really very thankfull to you sir.

The theme for this annual day is humanity .I don't think that if we are not teaching human values to our students right from their primary stage we are not imparting real education to them.

Today if we look in our surrounding the human values are declining day by day. There is a sequence of crime today prevalent in the society which is a very serious matter .The moral education today should we made a compulsory subject unlike those of science, maths and eng etc. so as teachers,as parents and as responsible citizen of course is our first and foremost duty to inculcate the human values in the children .

let me now proceed with the annual report.This school was started in the year 2016 with a mission to make each child into a whole some human being, how safely and unnoticed time flies one more year is added to the glorious sage of vibgyor world school. D/P our school is one of the newest and yougest of the other school in surrounding and is trying to run and compete with elder ones. To start with we had 137 students in our school and today the admission has reached 339, till class 8 . The school is progressing gradually in different spheres that could not be achieved without the support my teachers, parents and good management of course .

D/P the school building and its infrastructure is growing year by year you might have noticed, because this is the first and foremost task which leads to the stability in the teaching staff more inflow of admissions better co-ordination between the parents and school. In our school we have introduced the subjects library from the 4th standard to enable the reading habits among our students. To bring out inherent talent of the students music and dance classes are also these in time table from 4th onwards.

The year 2017 witnessed a leap in the progress of the school when one of our students Rijul Gautam of class 5 represented the school at NSO Delhi following the interaction with the scientists working at NASA.

I would like to mention that Vibgyor World School right from its inception did not have an easy sailing but matters is that we have tried hard to emerge successfully and victoriously and every moment is

memorable one. one thing I would like to bring in the notice of our chief guests that 90 percent of our students are from rural background despite of that students academics has improved a lot all because of the hard work of my teachers , the students here in our school are being given individual attention and if necessary the arrangement of extra classes is also there so as to avoid the unnecessary expenses and burdens of the extra tuition .The students here are being educated on a very nominal fee and transport charges and I am particularly obliged to educate the ward of the rural people here. the students are encourage for interaction in english along with the hindi interaction .Every Saturday of the week is engaged for the co –curricular activities like deferent games from different section ,debates ,declamations, panting ,poster making ,paper reading, mental maths quiz ,science and social science quiz competition etc. Students picnics and educational tours are organized in the month of September to give them the exposure of the outer world .Soon our students will have their basketball and volleyball track in our school which is the priority of the school management . In hut shall I would like to say this school has established itself as a premier institution of learning providing quality education and I consider it my pound privilege to be part of this prestigious school .

At last I would like to say for today's function ,each member of vibgyor family has worked really hard to make it a grand success and the parents of each and every students have also co-operated a lost with us for this. At last but not the least vibgyorians be not afraid of growing slowly be afraid of blowing steel. I am sure that all the vibgyorians will work hard in their lives and make their school and parents proud .I have you will reach the zenith in of your potential and become wise and successful human being .

My dear students unable to make yourself good human being and make this world ofcourse a better place than you find it today that will be the acid test of your pivillallaged education .At the end I would like to thank you all for daring me for so long time and I invite you to enjoy the beautiful cultural programs our children has prepared for you .

At last on the behalld of S. M. I wsth you all a very happy and prosprous dushhera and diwali In advance. May god bless you all **Jai Hind.**
